

I agree with the F.I.S.T.S. proposal to keep morse code and also make written exams harder. I also agree with having to wait 30 days before retaking a failed exam. I would have had to wait to retake some of mine but might have a better understanding of and appreciation for the material and amateur radio uses. The written material could include more about operating and QSL skills. F.I.S.T.S. has an excellent proposal that I can agree with.
